

Andykeating Order

to use the bot you'll need to follow these instructions:

- 1) Change the bot token located to src/config/config.json line 11
- 2) Change the database login information located to src/config/config.json line 3 to 7

Extra information:

All the text are write in the file en-US.json located in src/language/en-US.json. If you want to change the messages, you just have to change the text from here.

The commands are:

Prefix: ? (Can be changed in config.json)

Prefix + link + ingame ID + inflame Username: Will link the discord account to the targeted inflame account.

Prefix + unlink: Will remove the ingame account, and remove the gang role.

Prefix + start: Need to be started one time when the bot is on, used as a mirror between the game and the discord bot, each minute, it will check if a new gang is created.

If you enjoyed my work, you can tip me :) I would be glad to work with you again.
